Professional Summary

Aspiring Data Scientist and AI/ML Engineer skilled in Python, SQL, scikit-learn, and Power BI, with experience in NLP, neural networks, and building end-to-end intelligent solutions using Flask and Streamlit.

EDUCATION

Bachelor of Computer Applications (BCA) | IIMT University | 2025

Class XII (CBSE) | Vidya Bal Bhawan Sr. Sec. School | 78% | 2022

TECHNICAL SKILLS

Technical Tools: MS Excel, MS PowerPoint, Power BI, n8n, GitHub

Analytics Expertise: Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Reporting & Dashboarding, Process Documentation, Data Storytelling, and Data Visualization

Programming & Databases: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), MySQL, SQLite

AI & Development Tools: Flask, Streamlit, LangChain, NLP, Neural Networks, AI Agent & Automation Development

Soft Skills: Analytical Thinking, Problem-Solving, Team Collaboration, Effective Communication, and Adaptability

Work Experience

Data Science Intern — ShipCube (Remote) | Oct 2025 – Present

- Developing an **AI-powered Email Bot and Chatbot** using an **agentic pipeline** integrating *Hugging Face*, *LangChain*, and *LLMs* to automate customer support interactions.
- Engineered **sentiment analysis and content categorization models** with Python, Pandas, and NLP, achieving **96% model accuracy** on internal test data.
- Implemented **knowledge base ingestion and RAG (Retrieval-Augmented Generation)** to enable **context-aware email understanding and dynamic reply generation**.
- Collaborated in model fine-tuning, version control, and CI/CD setup on *GitHub*, improving pipeline reliability and maintainability.

Technical Intern (Design & Development Engineer) — Precision Electronics Pvt. Ltd (Remote) | Jul – Sep 2024

- Automated **data processing workflows using Python and Excel**, reducing manual workload by **40%** and improving data accuracy across reporting tasks.
- Designed **interactive Power BI dashboards and Excel reports** to visualize production and performance metrics, improving **team decision-making efficiency by 35%**.
- Created and presented **technical documentation and analytical reports**, enhancing **cross-team collaboration and project transparency by 25%**.

PROJECTS

- Book Recommender System** [LINK](#) — Built a personalized recommendation engine using Python, Pandas, Scikit-learn, and Streamlit, implementing collaborative filtering to deliver accurate book suggestions with **~80% top-5 hit rate**.
- Grammar & Spell Checker NLP App** [LINK](#) — Developed a real-time NLP web app using Flask and transformer-based models (Hugging Face, TextBlob) for **grammar correction and spell-checking**, improving text accuracy by **~45%**.
- End-to-End Bank Data Analysis** [LINK](#) — Executed complete data analytics workflow using Python, MySQL, and Power BI to create dynamic dashboards and insights, **reducing reporting time by 50%** and enhancing decision-making efficiency.
